# NASER ASHRAF YOUSSEF ABDEL FATTAH

**Junior Data Engineer**

Qalyubia, Egypt | +20 1508650961 | naserashraf248@gmail.com | LinkedIn | GitHub

## PROFESSIONAL SUMMARY

Aspiring Junior Data Engineer with hands-on experience building end-to-end ELT pipelines, cloud-based data warehouses, and scalable data solutions using Python, SQL, dbt, Snowflake, and AWS S3. Skilled in data extraction, transformation, validation, and modeling, with additional exposure to Machine Learning, Deep Learning, and Neural Networks via Scikit-learn and TensorFlow. Passionate about building reliable, automated data platforms that turn raw data into actionable business insights, with a proven ability to deliver production-like projects individually and in teams.

## EDUCATION

**Benha University — Faculty of Computers & Artificial Intelligence**
*Bachelor of Science in Computer Science*

## PROFESSIONAL EXPERIENCE

**Programming Instructor — iSchool (Digital Egypt Initiatives)** *2 Years*

- Delivered programming and AI fundamentals instruction over 2 years across the DEMI and DECI national initiatives, teaching students from 4th grade through 3rd secondary (senior year of high school).
- Taught Python programming and computational thinking, guiding students through practical, hands-on coding projects.
- Prepared lesson plans, coding exercises, and assessments to support structured, measurable learning outcomes.
- Mentored students individually, improving their logical thinking, debugging skills, and independent problem-solving ability.

## INTERNSHIPS & TRAINING

**Data Engineering Trainee — Rowad Masr (Microsoft Program)** *June 2025 – February 2026*

- Built end-to-end ELT workflows, performing extraction, transformation, and loading across multiple structured data sources.
- Worked with Microsoft data technologies to design and support scalable data pipeline solutions.
- Applied data cleaning, transformation, validation, and storage techniques to ensure data quality and reliability.
- Gained practical experience with modern data engineering concepts, including pipeline orchestration and data modeling.

**Machine Learning & Deep Learning Training** *Self-Study / Online Training | 2026*

- Learned Machine Learning and Deep Learning fundamentals through applied, project-based coursework.
- Built classification and regression models using Scikit-learn, evaluating performance with standard metrics.
- Developed Neural Networks using TensorFlow/Keras, including custom architectures and transfer learning.
- Applied feature engineering, preprocessing, model evaluation, and hyperparameter tuning to improve model accuracy.

## TECHNICAL SKILLS

**Programming Languages:** Python, C++

**Data Engineering:** SQL, Snowflake, dbt, AWS S3, Data Warehousing, Data Modeling, ETL / ELT Pipelines

**Machine Learning:** Scikit-learn, TensorFlow, Neural Networks, Data Preprocessing, Feature Engineering, Model Evaluation, Classification, Regression

**Data Analysis & Visualization:** Pandas, NumPy, Matplotlib, Power BI

**Tools:** Git, GitHub, VS Code

## PROJECTS

**End-to-End Data Engineering Project**

- Designed an end-to-end ELT pipeline implementing Medallion Architecture (Bronze, Silver, Gold layers).
- Loaded data from AWS S3 into Snowflake and built dbt transformation models for analytics-ready datasets.
- Implemented SCD Type 2 and Incremental Models, and performed automated data quality testing to ensure integrity.
- Designed One Big Table (OBT) and Star Schema data models to support flexible, performant analytics.

**Energy Data Warehouse ELT Pipeline (DEPI Graduation Project)**

- Built a production-like data warehouse processing the IDEAL dataset covering energy data from 255 UK households.
- Designed ELT pipelines to ingest, transform, and load large-scale household energy consumption data.
- Built Power BI dashboards generating business insights on energy consumption and efficiency for data-driven decisions.
- Collaborated within a team environment to deliver the project end-to-end on schedule.

**Python Data Processing Project**

- Automated data processing, cleaning, and filtering in Python to prepare raw datasets for analysis and reporting.
- Generated reports and reusable processing scripts to standardize repeatable data tasks.

## CERTIFICATIONS & LANGUAGES

Data Engineering Training — Rowad Masr (Microsoft Program) • Machine Learning & Deep Learning Training • DEPI Graduation Project (Digital Egypt Pioneers Initiative)

**Languages:** Arabic — Native | English — Intermediate
